Dear Hiring Manager,

As a Computer Science student at Dominican University who has spent over two years in a payroll support role, I'm looking for an entry-level position where I can bring those two worlds together. I'm especially drawn to roles in IT support, operations, and business systems, where accuracy, clear communication, and a willingness to learn new tools make a real difference for the people a team serves.

At After School Matters, I started as a Payroll Intern in 2024 and was promoted to Payroll Assistant a year later. I've resolved more than 5,000 Zendesk tickets from staff, parents, and teen participants, and I maintain records across four systems (Box, ADP Workforce, Smart Compliance, and Cityspan), tracking lost, stopped, and reissued payments in Excel and Google Sheets until they are corrected. Because even small mistakes can affect whether teens get paid, this work has taught me to check details closely and protect confidential information such as SSNs and banking details. I also lead training sessions and create reference guides for new hires and seasonal interns, which has shown me how much I enjoy helping others learn.

Alongside this, I have been building my technical skills through coursework and hands-on projects. At Duct Tape Games, I worked on a four-person team building a 2D Android game in Unity and C#, troubleshooting bugs and documenting fixes. For a university course, my team built a conveyor belt sorting system using a Raspberry Pi and Arduino, where I diagnosed hardware failures and picked up new languages and tools quickly. Most recently, I have been developing a web application for JLP Construction LLC, including a client-facing booking site and an admin dashboard that supports their consultation scheduling.

I am also fluent in English and Spanish, which helps me connect with the families I support every day. I'm excited to bring my support experience and growing technical background to a team where I can keep learning and help things run smoothly. Thank you for your time and consideration. I welcome the opportunity to discuss how I can contribute.

Sincerely,

Madeline Mendoza
