# Madeline Mendoza

Chicago, IL · madelinemendoza317@gmail.com · linkedin.com/in/madeline-mendoza/

## EDUCATION

**Dominican University - River Forest, IL** *Anticipated May 2027*

- Bachelor of Science in Computer Science | GPA: 3.9
- Mazzuchelli Scholars Honors Program | Dean's List

## RELEVANT EXPERIENCE

**After School Matters - Chicago, IL (Hybrid)** *June 2024 - Present*

*Payroll Assistant | June 2025 - Present*
*Seasonal Site Supervisor | June 2025 - August 2025*
*Payroll Intern | June 2024 - June 2025*

- Administer and maintain data integrity and confidentiality across four systems (Box, ADP Workforce, Smart Compliance, and Cityspan), identifying and resolving access and data discrepancies as they arise
- Track lost, stopped, and reissued checks in Excel and Google Sheets, keeping records accurate and up to date
- Resolve payroll and administrative support tickets (5,000+ resolved to date) through Zendesk, with additional support provided via RingCentral, Outlook, and in person for staff, parents, and teen participants
- Lead training sessions for new hires and seasonal interns on Zendesk and RingCentral, developing PowerPoint guides and reference materials, and providing ongoing support for related questions
- Promoted from Payroll Intern to part-time Payroll Assistant based on strong ticket performance metrics, technical proficiency, and effective communication
- Assist Payroll Manager in interviewing and evaluating candidates for seasonal intern positions

**Duct Tape Games - Remote** *January 2026 - March 2026*

*Application Development Intern*

- Diagnosed and resolved software bugs and runtime errors while collaborating in a 4-person team building a 2D Android game in Unity/C#
- Reviewed and debugged existing scripts to identify performance issues and documented recommended improvements
- Verified third-party integrations (Photon Engine, PlayFab), tracking issues via Trello, Discord, and GitHub

## PROJECTS

**JLP Construction LLC - Client Web Application** *September 2026 - Present*

*Client Project*

- Building a client-facing booking site where customers can request consultations
- Developing an admin dashboard for the owner to manage incoming requests and track payment milestones for projects
- Incorporating AI tools into the development process while building out features and functionality

**Conveyor Belt Location Sorter - Principles of Unix (CPSC 434)** *January 2026 - May 2026*

*Group Project | github.com/Oluwa-Temmy/434-fullfillment-center*

- Built a Flask/SQLite dashboard to track and audit scanned package data, supporting a Raspberry Pi and Arduino-powered conveyor belt sorter
- Diagnosed and resolved recurring hardware failures during assembly and testing, including camera QR misreads and servo motor burnout
- Developed Python scripts for QR code generation and decoding using PyZBar, and Arduino C++ motor control scripts
- Coordinated team meetings, sourced materials, and managed project deliverables
